DBMS assignment-2

BTech CSE core (A).
12/2/6

[Section-A]

1. Entity-Relationship (ER) Diagram
2. Relational model
3. Object-oriented model
4. Integrity Constraints.

[Section-B]

Q2. Data abstraction means hiding complex database details and showing only necessary information to users.

In healthcare system, data abstraction helps doctors, nurses & administrators access patient information easily without dealing with complex database structures.

How it simplifies interaction

1) Simplified interface
2) Role-based access
3. Improved efficiency
4. Data security
5. Reduced complexity

Thus data abstraction makes patient record management efficient, secure & easy to use.

Q no. 3// Benefits

1. Easy of use
2. Improved data security
3. Data consistency
4. Better system management/maintenance
5. Improved efficiency in healthcare operations.

Challenges.

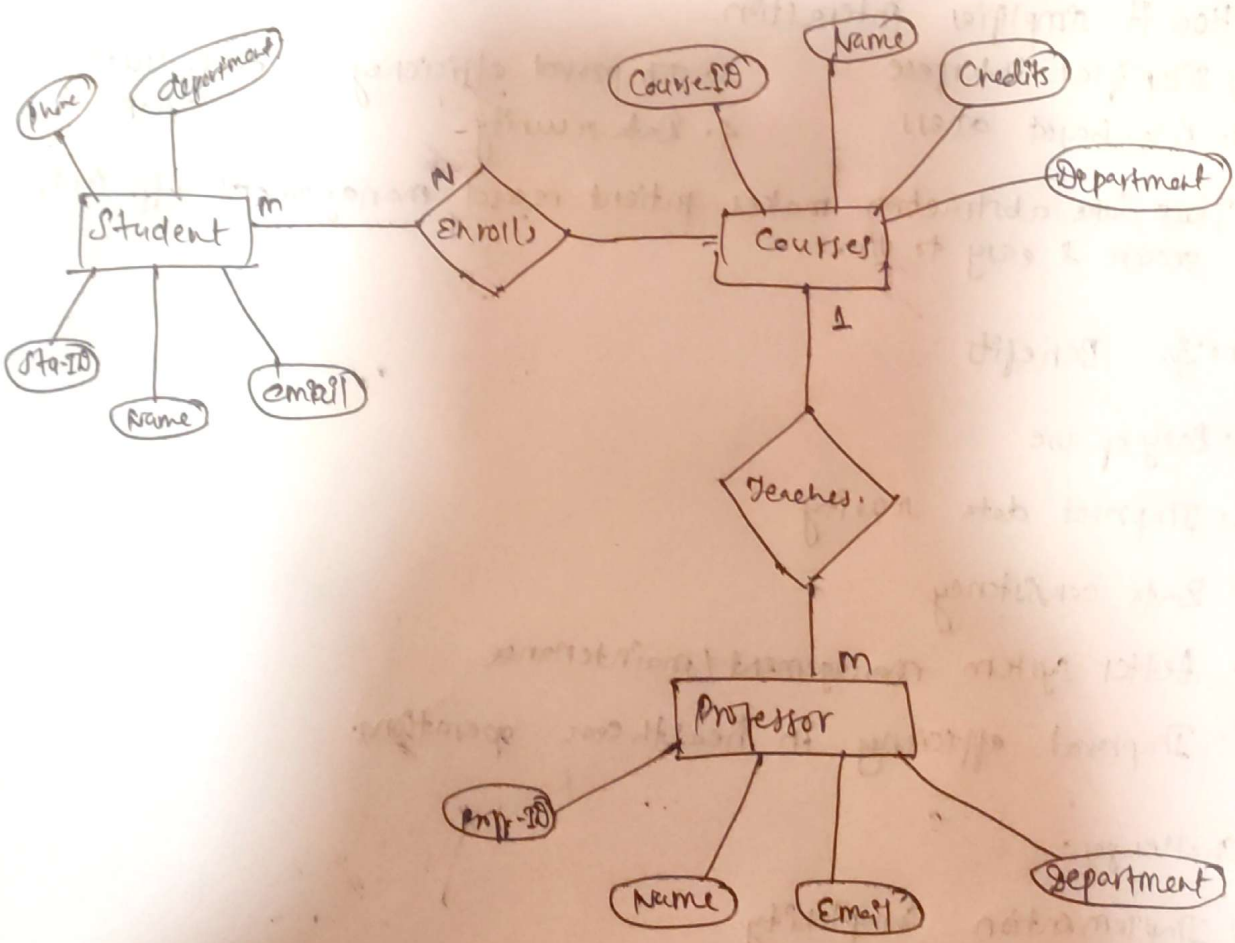
1) Implemention Complexity
2. Performance overhead
3. High development cost
4. Security risks is poorly implemented
5. Training requirements.

CamScanner

Section-C

Student (Student_ID (PK), Name, Email, Phone, Department)
Course (Course_ID (PK), Name, Credits, Department)
Attributes (Profit_ID (PK), Name, Department)

=) Relationships:

1. Student – Enrolls – Course
m:m


2. Prof – Teaches – Courses
1:m
